

## SATELLITE TRACKING

For Difficult or Remote Areas

Whether you conduct business in the mountain wilderness, barren deserts, or vast oceans, traditional GPS tracking is often useless without cellular or radio coverage. With GPS Auto Manager's fully satellite-based device, you can track your valuable assets all over the globe with ease and enhanced peace of mind.

~ Trucks

~ Personnel

**Smart Financially** - The most cost-effective asset tracking system on the market today

**Smart Coverage** - Reporting via OUR 24/7 online location platform gives you a "bird's eye view" of the location and status of every asset with real time mapping and history

**Smart Powered** - No wiring, antennas, or external power needed. Bolt Sat Finder on, turn it on, and log on to your account. Up to three years of battery life on AA Lithium Batteries.

**Smart Sized** - Sat Finder footprint is a little larger than two decks of cards - 160mm x 235mm x 26mm

**Smart Security** - Can use GPS to determine when an asset is outside its defined location of operations. The Sat Finder sends alerts until the asset has been recovered.

**Smart Choice** - Our standard package allows for the receipt of two positions a day from anywhere in the Americas, but Sat Finder can be custom configured to manage specific asset needs and provide emergency alerts via email and SMS.

**Life of Service** - Specifically designed to track assets in the field under harsh environments.
